Monitor Learning Progress

What is it? Learning Progress is a feature that allows teachers to monitor students' learning based on their mastery of questions attempted in assignments. To make the most of this feature, teachers should ensure that questions are tagged to the subject's Content Map, and included as part of Learning Progress calculation.

Add Subject to Teacher-Created Class Group

0

Only class groups assigned from the School Cockpit will have the Learning Progress feature enabled by default. You must add ONE subject and level to Teacher-created Class Groups to be able to track Learning Progress data.

Tag your Lesson/ Course with the Subject, Level, Content Map,

Tag the questions in your assignment with the relevant topic/ sub-topic, or copy the tags from your Lesson/Course.

Each question should be tagged to one topic/sub-topic only. Tagging questions to more than one topic/sub-topic will result in inaccurate data as the marks will be counted more than once.

Check the box "Include in Learning Progress" for each of your questions. You can also do this quickly in a quiz.
