#Gamify_with_SLS

# Recreate Game-like Competition

Step 1

Create a new course or use an existing course, and enable the gamification feature. Add a Game Story to tell a narrative!

Tip: Search 'Gamification Template' on SLS for ready-made gamified lessons created by other teachers to save time! Simply populate the templates with your content.

Step 2

Speed up lesson creation by applying pre-defined XP and Level settings (or edit them). Consider adding small Achievements for students to taste success as they progress!

Step 3

Worried that students will rush through the game? Apply Game Conditions so the Game Story progresses after they have met your requirements.
