

The Curator

You take extraordinary delight in curating collections of a variety of teaching materials - GIFs, videos, animations, and more!

At work

You love to pull together collections of media for your students to support all types of learners in your class - visual, auditory, and kinesthetic!

At home

You probably collect material on your areas of interest (like how to design your new BTO flat) on Pinterest or physical scrapbooks!

Favorite SLS tool

Like The Builder, you love to Star resources - having a relevant selection of resources makes lesson creation that much quicker and easier!

Helping others

Share your curated resources in a Class Group set up just for your department as part of professional development.

SLS Recommends

Try embedding different media types so students can view all the resources without having to open too many new tabs. You can also share them via Class Groups so it is always assessable! [Find out more.](#)
